

Dairy's Road to Copenhagen

***Joop Kleibeuker
Secretary General, EDA,
EDA Sustainability Press Event
Brussels, 4 June 2009***

Why should Dairy Sector work on the road to Copenhagen?

- Dairy production/consumption contributes to global GHG emissions.
- Adequate dairy production/consumption of main importance for society.
- Dairy sector fully aware of its responsibilities in relation to the future of GHG emissions.
- Significant results obtained already.
- Broad range of projects on further improvement agreed or under development.

Global Approach

- GHG emissions have global effects:
 - Global approach needed
- Although many differences between milk production and milk processing in different countries, also in many aspects similarities

Joint initiative of series of international dairy associations

- **Develop “*The Global agenda for action on climate change*”.**
- **Work on standardised approach for LCA/Carbon footprint for dairy.**
- **Global coordination on improvement projects:**
 - **Summarising finalised and ongoing projects**
 - **Supporting exchange of experiences**
 - **Initiating joint research projects**

What you will see in the months ahead

- **24 September: signing Global Agenda at World Dairy Summit in Berlin**
- **Launch of Sustainable Dairy website**
- **Presentation of Green Paper on ongoing projects in the dairy industry**
- **Dairy Sustainability policy conferences in all major capitals**
- **Clear presence of dairy in Copenhagen during UN Conference**
